

**NEW**

# The New Dentalcompare

Top products. Best practices.

In 2011 we redesigned Dentalcompare to help dental professionals more quickly research and discover the right products for their practice.

## Easier navigation

New look and easier navigation to help clinicians find the information they need. The homepage is the destination for everything happening in the dental industry and gives quick access to the latest content, top videos, and most viewed articles.

## Jump to related information

When searching for a product, related articles, news, videos and events are always a click away. Related information is always specific to the product users are searching for to help them learn more.

## View all the details

We want users to have all the information they need when researching a product to purchase. Product listing pages on Dentalcompare now feature product image galleries, videos, related articles, complete specifications, and manufacturer contact information.

## The new morning paper

The Dentalcompare articles section is now in newspaper format. With the most recent articles on the forefront, dentists can easily stay up-to-date with the dental industry.

## Updated video library

The new video library includes larger players, quick quote request, sharing capabilities and advanced sorting. We've made it easier to learn a new technique, watch a product demonstration, or learn about the latest products at a tradeshow.
