

Generate Sales Leads Online

Accelerate your sales cycle with high quality leads from decision makers who are ready to buy. Dentalcompare has created a single resource where dental professionals can view product details, watch demonstration videos, and read about the latest technologies. The leads you will receive are from informed decision makers actively looking for new products and services.

Product Directory

Our product directory has been created by clinicians for clinicians, making it easy to find your products. Product listings contain full specifications, links to your website, contact information, and the options to request a quote or more information.

Gain Quality Sales Leads

Dentalcompare's Lead Generation system is a proven method for generating a steady stream of highly qualified, product-specific, targeted sales leads with a high conversion-to-sales ratio. All marketing channels direct users to either fill out a request quote form, or click through to your product page. Our lead system also allows customization of lead reports for easy loading into your CRM system.

Measure Return on Investment

Unlike many forms of advertising, you can track and measure the results of your marketing campaign with Dentalcompare. You can accurately determine your return on investment by tracking all the leads, clickthroughs, and impressions received for each of your products and advertisements.
