

# Quick Pick

## Dental Chairs/Dental Stools

Each member of your practice deserves ergonomically designed seating, especially since they'll spend hours sitting down. You'll not only feel comfortable, but you'll avoid a visit to the doctor caused by years of poor posture and form. Each of the manufacturers below offer dental stools that have a myriad of adjustment controls and built-in technology that can put massage chairs to shame.

<b>Description</b>	DentalEZ8 Group's new ErgoSure™ Stool Line offers each player on the dental team—dentist, hygienist and dental assistant—ergonomic stools. All models are equipped with four independent seat mechanisms for easy adjustment of height, seat tilt, back in and out and new concealed height-adjustable lumbar support. The stools also features an integral non-slip skin foam technology texture that is easy to disinfect.	Adjustable levers — seat height and back tilt, for ease of adjustment without getting out of the seat. Integral gas cylinder for easy seat height and seat back adjustment. Five dual wheel casters in aluminum base for extra stability and durability. Available in Naughasoft or Ultraleather upholstery.	While much attention is paid to the patients comfort, it is equally important for you to have ergonomically correct seating. Correct posture is critical to maintaining a pain-free career, not to mention day-to-day comfort. That's why Midmark has paid special attention to the ergonomic construction of our dentist and assistant stools. Available in a variety of colors to match your Midmark or Knight chair. With 4-way adjustable lumbar support, locking seat tilt, and a contoured rectangular seat, the Midmark Dentist Stool is the epitome of seating. Available with or without arms. And like every other Midmark product, the quality and durability is unparalleled.
